

Basic

Assessment and Support in Paediatric Intensive Care

Monash Medical Centre Melbourne
7-8 December 2015

Paediatric BASIC

7-8 December 2015

Outline

Paediatric Basic Assessment and Support in Intensive Care is a two-day interactive course comprising lectures, workshops and skills stations.

The course covers fundamental knowledge and skills for doctors working or training in PICUs, regional ICUs and other critical care environments that provide intensive care management and/or advanced resuscitation and pre-transport stabilisation of critically ill and injured children.

Aims

Prepare critical care and paediatric medical staff for the first few hours of paediatric intensive care until the patient is transferred.

Prepare non-intensivists to manage acute deterioration of critically ill paediatric patients.

Prepare paediatric, emergency medicine, and anaesthetic staff for paediatric critical care medicine.

Contents

- Airway management and mechanical ventilation in children
- Basic haemodynamic monitoring
- Fluid management in critically ill children
- Management of paediatric septic shock
- Initial management of shock in congenital heart disease
- Paediatric critical care transport
- Pre-course MCQ assessment, post-course MCQ exam
