About HCA Healthcare UK

HCA Healthcare UK is a group of world-class, awarding-winning private hospitals, specialist clinics, outpatient and diagnostic centres spread across London and Manchester. As well as providing advanced, high-quality care to patients, we are also partner with leading NHS Trusts.

Why HCA UK

We will support your ongoing learning in an environment that features advanced equipment and practices, one of the best colleagues-to-patient ratios in the UK and varied, interesting work. As part of HCA US, the world’s largest healthcare company, we can also promise that you will learn from experts in every department and that your opportunities will be endless. With us, you will be empowered to achieve more in your career and more for our patients.

About the role

We are actively seeking to recruit a Specialist Trained Registrar in Critical Care Medicine to work on our level 3 adult intensive care unit as a Critical Care Registrar. This is a small friendly unit and where you will support the main consultants updating them regularly with new ward admissions, ward rounds and medical observation of their patients. This will include performing routine medical procedures, updating all patient records, working in partnership with our specialist nursing team and ensuring there is a high level of patient care provided.

Job Description

- As the Critical Care Registrar you will also be responsible for being the first responder for any cardiac arrests and work in partnership with the other RMOs in the hospital, supporting them if required.
- Rotas provided on average 6 to 8 weeks in advance to plan work life balance. The role requires assessment, management and treatment of Critical Care patients including those with multi organ failure, requiring cardiopulmonary support, airway management including intubation and tracheostomy care, ventilation and management of arrhythmias. Most patients are admitted the unit for HDU level short stay post-operative support; however, there are also complex long-term patients requiring multiorgan support and ventilatory weaning with tracheostomies.
- You would be required to be competent with inserting and managing central venous lines, vascaths and arterial lines, management of airways and ventilators including in emergency situations, management of acute pain including management of epidural analgesia.
• As the most senior resident doctor you would form part of the emergency resuscitation team and provide guidance and support for the resident ward RMO.
• You will have the opportunity to take part in quality assurance activities, education of the MDT, education and training to continuously improve and strive for excellence, for staff and patients.

To Apply for the Role:
- You will need to have minimum 2 years’ experience as a Specialist registrar in Critical Care.
- Evidence of skills in the management of patients not requiring hospital admission (Phone triage)
